ASTROLOGY AND ALCHEMY: INSIGHTS FOR CHANGING TIMES WITH MICHELLE KAREN AND DUANE SAARI. This is a 90-minute teleclass in follow-up of two workshops given at the Third International Alchemy Conference held at the LA Conference Center, October, 2009. Here is an opportunity to participate in a presentation/discussion of a message for our times from two sister esoteric practices--astrology & alchemy.

Duane Saari will share his viewpoint on the first essential steps early alchemists took to prepare themselves for achieving the goal of their laboratory work--development of their spiritual and psychological characteristics to achieve the Great Work of perfecting themselves and everyday matter.

Michelle Karen will elaborate on her presentation at that Conference, The Alchemy of Transformation Between Now and 2012. The synchronicity between Michelle’s presentation and Duane’s, The Emerald Tablet: A Path of Change & Renewal, was evident to many participants. Duane and Michelle have agreed to offer this follow-up session as part of Michelle’s teleclass series.

ALCHEMY: THE ART OF TRANSFORMATION
A Free Public Lecture at the University of Chicago
Sponsored by the International House Global Voices Program.

In this thought-provoking lecture, bestselling author Dennis William Hauck reveals the secrets of the ancient art of transformation and shows how the universal principles of alchemy can be applied in the modern world.

The symbolism of alchemists is revealed in stunning images, and their philosophical concepts come alive in stories and anecdotes from the author’s training as a mathematician at the University of Vienna and his apprenticeship in alchemy in nearby Prague. Though the alchemists spoke of retorts, furnaces and chemicals, they were really talking about changes that were taking place in their own bodies, minds and souls. This level of work by true alchemists went far beyond the foolish efforts of charlatans who sat at their furnaces pumping their bellows trying to change lead into gold.

Did You Know?

The “Alchemist Moon” is a reference to the moon being half white and half black and represents a balance within polarity. Many speak about the influences of the full moon and also the new moon, yet are less conscious about the harmonizing influences of the Alchemist Moon. Also known as the Quintessential or Spagyric Moon, this potent event occurring twice per lunar cycle offers enhanced potential for alchemical operations such as transmutation of species towards an intention of living medicines; an astrological acknowledgment of balance within Nature’s elements.
